TARITI.—We have frequent arrivals from this place, but the difficulty attending the procuration of authentic intelligence concerning the late hostilities is inconceivable to any one who has not tried it. Reports are rife, varying according to the temper of the parties. From our own correspondence we can only glean that during May and June, Gov. Bruat with 1000 men and a steamer, attacked the several camps of the Tahitians at Papenoo, Hantans and Hunaauia, and in the conflict lost several men in killed and wounded, including some superior officers. The natives remained masters of the interior, but were driven to great straits by the destruction of their cultivated grounds and the desolation of their valleys. Numbers have since come into the French lines and given up their arms. Three of the English missionaries offered to mediate before the late battle, but Gov. Bruat would grant no terms short of actual sulmissionaries oriered to mediate before the late battle, but flow. Brant would grant no terms short of actual sub-mission. LOSS OF THE AMERICAN WHALER BALTIC, CAPT. BULLER, OF NEW BEDFORD.—The Bengal whaler arrived at this port on Tuesday, Aug. 3, bringing the officers and crew of the Baltic, wrecked June 16, on Ehering's Island, lat. 56 N. She went ashore in a gale of wind at 51 M. while the crew were about taking in sail, and in haif an hour broke entirely up. The crew landed in the boats and remained on this inhospitable island encamped on the beach until July 5, when then the Bengal appeared and took them off. About 900 barrels oil were saved, and purchased by the Captain of the Bengal. Some Russians who lived on the island about 10 miles from the wreck, treated the crew with all the kindness their circumstances admitted. Some idea may be formed of the climate of the island from the fact that although it was Summer, the snow in piaces lay piled to the depth of 40 or 50 feet. The Baltic had on board 2,100 bbls oil, and was insured to her full value.
